EXPERIENCE

ChowNow, Los Angeles, CA — Product Delivery Engineer I

MAY 2018 - PRESENT

Programming in an agile environment with 2-week sprints. Working on projects using JavaScript, HTML, CSS, and Python to help automate our integration process. Managing our support website and working with our design team to update and QA it so it follows our latest style guides.

Manage communication across teams to confer about best practices.

Journal Technologies, Los Angeles, CA — Systems Analyst

NOVEMBER 2018 - MAY 2018

Worked with clients to understand and solve issues to develop and configure JTI's case management software using Java, Groovy, and Velocity. Worked with project managers and developers to design screens, searches, workflows, and reports to complete the project cycle through development, testing, debugging, and documentation. Wrote queries in MS SQL to maintain data models and organize the databases.

Nails by Alex, Madison, WI — Owner

AUGUST 2014 - MAY 2017

Built a home-based manicure business based on referrals and social media. Managed a personal website in which clients made appointments. Dealt with public relations, revenue management, promotional writing, and several social media platforms.

EDUCATION

University of Wisconsin-Madison, Madison, WI — Communication Arts & Computer Science

September 2013 - May 2017

I majored in Communication Arts with a focus in rhetorical sciences, and I minored in Computer Science.
